Planning Projects 2011-2012

- Developing a list of projects for consideration by OEA for 2011-2012 Grant Cycle
- OEA money is 90% money
- OEA is willing to consider funding planning projects that are related to the military growth
- Please ask your planning staffs to give this some thought
 - The 10% match?
- Need a two paragraph description of the project. One of those paragraphs needs to tie the project to the military growth.
- *No guarantees – OEA money for new projects may be in short supply, and money for the 10% match is also not plentiful*
